### Comments

The slide mechanism includes the following components: armature, shackle, band fall damper and two-hand action spring hook.

If the user changes, the previous user must be deleted and the new one entered.

The time card design meets the DIN standard EN 365 section 2.1.

The slide mechanism may only be used in the intended manner within the ZARGES arrester system in conjunction with a catching belt according to EN 361. For use of the slide mechanism, the specifications from the Use Instructions (No. 291325) must be followed without fail.
